

# Problem Statement

We've had problems finding a way to make money while in school because it is hard to balance work and school.

## Details

We want to create a website that shows options for part time online jobs. If a college student does not have a car or cannot afford uber, it's difficult to have a normal job. There are not a lot of online part time jobs in general, but it would be extremely helpful for the ones that are available. This would only be available for students that attend University of South Carolina. It will contain an about page, contact page, ways to search types of jobs, requirements, etc.
